- *Available with Pumpers, Pumper-Tankers, Aerials, & Rescue Apparatus*
- *Heavy Duty Stainless Steel Construction*
- *Designed for Ease of Maintenance*

**FIREFIGHTERS PROTECT COMMUNITIES - SEAGRAVE PROTECTS FIREFIGHTERS®**

### Superior Value

The Capitol<sup>®</sup> offers Superior Customer Value for customers looking for a heavier duty, easier to maintain, access, operate, and a more comfortable fire apparatus. The Capitol<sup>®</sup> is engineered and built with more structural integrity than any other brand on the market. Like all Seagrave cabs, the Capitol<sup>®</sup> is inclusive of a rigid stainless steel sub-assembly safety structure that surrounds occupants and a stainless steel body with hemmed and welded door skins built to endure any situation.

### Ease of Maintenance

- Access to the air filter, engine and transmission fluids, coolant reservoir, DEF, and batteries without the need to tilt the cab for routine, in-station, preventative maintenance
- Dedicated access panels allow quick, easy adjustment of door latches
- Shock brackets single side fasteners

### Ease of Access and Improved Comfort

- A lower-to-the ground cab floor allows for access with only two steps.
- Higher flat roof cab ceiling clearance of 59", multiple cab length & raised roof options
- Wider crew doors allow for easy egress with turnout gear, doors same width top to bottom
- Crew area flat floor eliminates tripping hazards and allows for easier entry and exit
- The independent, dual zone AC system with double condensing capacity provides maximum cooling for the front and rear areas of the cab
- Improved air ducting and diffuser system delivers precise air flow control throughout the cab
- AC gravity drain simplifies maintenance without reducing the cooling system efficiency.
- Dual compressor AC system available near HVAC
- A 20% more powerful front defrost with six enhanced air diffusers clears windshield and side window condensation much quicker
- Improved seat positions in front and crew cab areas offering additional leg room, hip room, and workspace with turnout gear
- Recessed seat belt retractors improve crew area space and reduce interference with crew cab features and personnel

### Ease of Operation

- Higher position of the air intake reduces risk when crossing standing water in emergency situations
- Lower center of gravity provides for easier handling of turns
- Available cab access doors allow for quick access to internal storage space from outside the cab
- Improved visibility for Driver and Officer provided by higher seating positions coupled with a lower profile dash
- Additional power distribution area dedicated to the crew cab area.
- Writing/map desk available on the dash for improved officer work space area
- Optional recessed grab handles reduce truck profile in narrow streets and alleys

# Protecting What Matters Most

## ***Seagrave Stainless Steel Capitol<sup>®</sup>***

### **136" Capitol / Level Roof / 27" Side Access Door**

This remarkable cab begins with a Seagrave exclusive – a substantial three inch rectangular-tube steel subframe. Welded over this subframe is a completely enclosed, all-stainless steel superstructure that creates a protective cage. The entire structure is then covered with heavy gauge, stainless steel. The finished Capitol<sup>®</sup> is one of three premiere cab choices, designed to outperform in longevity, durability, and safety.

**The Capitol<sup>®</sup> is engineered and built to provide maximum safety, longevity, and durability**

#### **Cab Safety Cage Specifications:**

Roof Assembly: 1.25" Stainless Steel Tubing  
Front A Pillar: 2"x3" Stainless Steel Tubing  
Back Wall: 1.25" Stainless Steel Tubing  
Sides: 1.25" Stainless Steel Tubing

By purchasing a Seagrave, you are showing the utmost regard for the safety of your department's personnel. Seagrave cabs are constructed of the highest quality materials and produced with exceptional craftsmanship. Seagrave cabs are built with the customers in mind. Seagrave cabs feature a robust safety cage designed to protect firefighters in the occurrence of a collision.
